Bosgowan Bon Jovi is a bull with more than 740 daughters in nearly 160 different farming operations. Arbbonjovi is an Aussie Red bull with Swedish and Norwegian blood combined with Australian blood. Arbbonjovi scored well in Australia on percentages for (0.34% for fat 0.23% protein) The dam and grand dam of Arbbonjovi have respectively made 5 and 6 lists and have calved almost every year. The calving

pattern of his maternal line is something that is reflected in his breeding values given he scored extremely well with 104 for daughter fertility in Australia, a place where conditions are more extreme.

Arbbonjovi has a high reliability factor and is the best A2/A2 bulls from the Aussi-Red breed. The farmers are happy with how easy it is to work with the daughters of Arbbonjovi. The life span of his daughters is also good. Arbbonjovi is one of the most used bulls in Australia and will certainly add new blood to the Dutch Red Holstein population.

Herdbook number : AU A20014474

UK A.I. Code : A 9243

		Breed	:	100% SRB
