

Cattle Genie present pedigree Fleckvieh bulls from K.I.SAMEN and SIMMENTAL FRANCE that deliver sound udders and improved legs and feet.

MANFRED a Bavarian born bull from the German sire BFG Masseur x BFG Manitoba x Rureif. His Dutch daughter proof displays good udder quality, correct milking traits and Manfred provides extra muscle.

VITELLO another German bred bull that will provide high milk rates with best udder and calving ease.

LIKINGER is a son of Wikinger from a BFG Manitoba dam, he provides longevity and sound conformation, good milk & components with correct milking speed.

MERLIN is a son of Haddock, a proven bull with high productions, from a Rau dam. Merlin scores high for udder, longevity and lifts milk rates especially fat.

New bull TONY PP is a polled Fleckvie from an organic herd providing high yield with improved legs & feet and udder qualities.

ROKOS brings high milk & milk solids, super conformation + parlour traits

Vitello (Vox x Sampro x Rau) is a Fleckvieh bull from the south of Germany with a solid pedigree containing bulls with daughter proven inheritance scores, including some with numerous productive daughters in the Netherlands. Vitello also has a maternal line that shines in milk production and durability. The two oldest daughters of Vitello's sire Vox are now on their third lactations. Just like his sire Reumut, Vox has a very good production transmission pattern, his daughters also inherit good frames, good muscularity, fine legs and very good udders (including teat placement). He also scores above average for milking speed, somatic cell count and fertility.

On his maternal side we find Rau, a bull who has produced more than 2500 daughters in production in the Netherlands. His German daughter Amsel is Vitello's grand dam. She is a particularly productive and durable cow who achieved lifetime production in excess of 70,000 kg of milk. Like her daughter Anita (Vitello's dam) she has very good conformation that includes good legs and very good udders. Vitello's dam Anita has already given birth to four calves (and notes lifetime production to date of around 40,000 kg) and is still in excellent health. Her sire Sampro is a proven calving ease bull.

- Very easy calving bull at 114 on the German base, many calves born in Britain
- First Daughter type proof backs up British milking daughters, very good udder type and super parlour traits
- Improver of Milk, Production & udder health
- Calves from Holsteins quickly develop after two weeks good shape and muscles
- High longevity and improves feet and legs
